University of Michigan Ann Arbor

Stephen M. Ross School of Business | School of Literature, Science & Arts
Dual Degree: Computer Science | Business

Ann Arbor, MI
May 2025
GPA 3.45

ENGINEERING & PRODUCT

Skilt, Inc. ([Live App](#))

Founder & Lead Engineer

Ann Arbor, MI
February 2024-Present

- Architected and shipped 3 production releases of an AI platform deployed on Vercel, leading a 4-engineer team and owning full-stack system design (React, Express, Firestore), incorporation, and raising \$17K.
- Designed and implemented an LLM pipeline to dynamically generate structured skill trees and personalized quest content using prompt orchestration, structured JSON outputs, and schema validation.
- Built a rubric-constrained LLM evaluation system where user-submitted artwork is scored against quest criteria with structured output validation and error handling for malformed responses.
- Scoped and implemented onboarding and authentication flow with trial gating, including localStorage-to-Firestore data migration to preserve user progression upon account creation.
- Led customer discovery through 30+ user interviews and usability tests, translating ambiguous user workflows into prioritized product requirements and iterative feature releases.

WolverineSoft Studio

Producer, [Curse of the Corsair](#)

Ann Arbor, MI
January-May 2023

- Directed a cross-functional team as project manager including Programmers, Artists, Audio, and Designers to support the production of level design for Curse of the Corsair, converted playtest findings into specs & acceptance criteria; ensured shipment to Steam and Itch.io with 1 semester deadline.
- Led squad meetings, researching production process and design development, bug reporting and playtesting, cutting scope to meet milestones, using Jira, Github, Confluence, and agile workflow.

MyEarthly

Founder

Ann Arbor, MI
September 2023-May 2024

- Founder of an early-stage startup to develop a sustainable product database and ESG metrics, conducted 50+ interviews with diverse stakeholders to uncover user insights and define product requirements.

ENTERPRISE & CLIENT

JP Morgan Private Bank

Summer Analyst

Seattle, WA
June-August 2024

- Analyzed and synthesized complex UHNW client requirements across investments, lending, and estate planning to develop tailored wealth strategies and data-driven client reviews.
- Conducted technical due diligence on the TPG Rise Climate II fund and performed market research to align ESG-focused portfolios with institutional risk and return frameworks, pitched fund thesis to senior bankers.

Federal Reserve Bank of Philadelphia

Business Analyst - Product

Philadelphia, PA
June-August 2023

- Performed data analysis of business lines by processing over 100 thousand data points that resulted in >\$2 million in savings over 5-year period for the 12 regional federal reserve banks.
- Wrote technical business process documentation of key product lines, attended daily standups to support the Core Voice telephony team and digital transition to cloud systems.

Comerica Bank

Senior Technology Co-op Intern

Auburn Hills, MI
June 2022-June 2023

- Performed financial analysis of fax lines that identified \$1.24 million in savings over 5 year period and data analysis of data network that identified \$156k in savings over 1 year period.
- Built interactive Power BI dashboards to visualize the needs of 8,000+ employees, using user segmentation research and design thinking to develop personas and match tech. solutions to workforce requirement.

Environmental Consulting Organization at University of Michigan

Vice President of Technology

Ann Arbor, MI
January 2022-May 2023

- Led Ann Arbor City Government outreach to source consulting engagements, onboarding H.E.H. Human Electric Hybrids LLC and managing the client relationship from scoping to delivery.
- Led the Tech Team as a project manager to develop an interactive sustainability heatmap data visualization for the University of Michigan to track key ESG metrics across campus buildings.
